Exam map and method

Section	Items	Points
Non-finite verb forms	15 gaps	15
Tense and aspect	20 gaps	20
Modal items	15 gaps	15
Relative clauses	10 gaps	10
Theory and analysis	15 MC	15
Translation	10 sentences	25

THE 20-SECOND DECISION ROUTINE

1. Name the target. Is this tense/aspect, a modal meaning, a non-finite governor, a relative case, inversion or an article?
2. Read the full context. The same form can express different meanings.
3. Build the verb phrase. Finite auxiliary first, then non-finite forms in the correct order.
4. Check structure. Commas, relative case, do-support, if-clause sequence and article choice.
5. Read once for meaning. A grammatically possible sentence can still be the wrong interpretation.

Highest-yield fact
Translation is 25% of the exam. Practise complete sentences, not isolated rules.
